REDUCE YOUR SCAFFOLDING PLANK COSTS BY UP TO 60%*

PLUS

70% FASTER TO INSTALL

Up to 70% faster to install than standard timber planks.

100% LONGER LIFESPAN

Up to 10-year lifespan versus 5-year average life expectancy of well-maintained standard timber planks. E-SCAFF is manufactured with UV resistant materials.

75% LESS MAINTENANCE

Up to 75% less maintenance, E-SCAFF does not rot and is easy to clean.

50% LESS TRANSPORT & STORAGE COSTS

Up to 50% more cost effective with reduced weight and storage space used. *

75% LESS WEIGHT

E-SCAFF weighs approximately 16 KGS compared to approximately 69 KGS of dry timber planks.

IMPROVED HEALTH AND SAFETY

Reduce the amount of weight your scaffolding team lifts by up to 75% (1.8 tonnes) per average house (33 bays).

*SAVINGS ARE CALCULATED BASED ON CASE STUDY ON TUBE AND CLIP SCAFFOLDING SYSTEM, E-SCAFF VERSUS STANDARD TIMBER BOARDS AND E-SCAFF'S 10-YEAR LIFESPAN.

E-SCAFF CAN HELP YOUR SCAFFOLDING BUSINESS REDUCE COSTS AND IMPROVE PRODUCTIVITY.

In a recent case study, the installation time of E-SCAFF was compared with traditional timber planks, both installed to regulation on a Tube and Clip scaffolding system. The results demonstrated that E-SCAFF is approximately 70% faster to install. This could be the difference between two houses installed per day rather than one, saving you time and money.

	E-SCAFF INSTALLATION TIME	TIMBER PLANKS INSTALLATION TIME
Supporting tubes and clamps required per bay	1.0 mins (1 tube + 2 clamps)	2.3 mins (3 tubes + 6 clamps)
Lashings required per bay	0.0 mins (none required)	2.0 mins (2-3 lashings)
Decks and holding clips required per bay	1.7 mins (1 E-SCAFF + 6-8 snap fit clips)	6.0 mins (4 timber planks + 4 clamps)
Total installation time per bay	2.7 mins	10.3 mins

Total installation time on an average 100 m house (33 bays)	89 mins 1 hr 29 mins	340 mins 5 hrs 20 mins
